## Two-Color Print and Apply System Hermes C

Made in Germany

# Two-color printing and applying in real-time

Hermes C is the first labeling system worldwide to print and apply two-color labels in one operation. It has been developed and optimized especially for applications corresponding to the new Classification and Labeling Inventory according to GHS.

Due to the integrated backfeed system single labels can be printed and applied on request without loss of labels.

All shapes of packaging can be marked, for example bottles, cans, drums, buckets, cardboard or pallets.

Because of the modular construction system Hermes C offers a proper solution for every application.

- **Designed for industrial application**
- **Simple integration in production lines**
- **Interfaces to connect to ERP and Process Control Systems are available**

When it comes to marking chemicals and hazardous substances, GHS and REACH demand new, standardized pictograms. The guidelines apply worldwide.

As part of this standardization, imperfectly printed danger symbols, for example blank rhombs, are not permitted any longer.

With Hermes C labels can be individually designed and printed.

For your application we provide labels and ribbons, BS5609/3 certified as well (see page 11).

## Sample label

**GLUTARALDEHYDE SOLUTION 50%**

23005 QTY NET 1 KG 0,88 L. BATCH: test281114

**UN 3265**  
CLASS 8 E2

CORROSIVE LIQUID, ACIDIC, ORGANIC,  
N.O.S., Glutaraldehyde  
CAS: 111-30-8

**DANGER** Hazardous Statements Very toxic to aquatic life. May cause respiratory irritation. May cause allergy or asthma symptoms or breathing difficulties if inhaled. May cause an allergic skin reaction. Causes severe skin burns and eye damage. Toxic if swallowed or if inhaled. Harmful to aquatic life with long lasting effects. Precautionary Statements Avoid breathing dust / fume / gas / mist / vapors / spray. Wear protective gloves / protective clothing / eye protection / face protection. In case of inadequate ventilation wear respiratory protection. IF SWALLOWED: immediately call a POISON CENTER or doctor / physician. IF ON SKIN (or hair): remove / take off immediately all contaminated clothing. Rinse skin with water / shower. IF IN EYES: rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor / physician. If experiencing respiratory symptoms: call a POISON CENTER or doctor / physician. Store in a well-ventilated place. Keep container tightly closed. Contains 1,5-pentanedial

cab Produkttechnik GmbH & Co KG · Wilhelm-Schickard-Str. 14 · 76131 Karlsruhe / Germany · Emergency number +49 721 6626-0

All information on scopes of delivery, design and technical specifications correspond to the date of the printing. Subject to change. The data provided in the catalog do not represent any warranty or guarantee. For current data see website [www.cab.de/en/hermes](http://www.cab.de/en/hermes)

# Technical details

**1 Graphic display**

The white backlight provides good readability. Depending on the installation position, the display may be turned in 90° steps.

**2 Navigator pad**

Simple, interactive menu control, only applicable functions are displayed by the day and night design. Along with the graphic display the menu navigation is easy to understand.

**3 Ribbon holder**

Quick and simple exchange of ribbon due to three-part tightening axles

**4 Metal chassis**

For the mounting of the modules it is made of torsion resistant die-cast aluminum.

**5 Print positioning**

The print position is automatically set after a new label roll has been inserted. The reference value is kept even if the device is switched off.

**6 Print heads 1 and 2**

The pressing force can be adjusted according to the label width.

**7 Ribbon saver**

At print head 1 the print head is lifted within the unprinted area and the ribbon is stopped during label feeding.

**8 Transport system**

Ball bearing mounted rollers provide high printing accuracy.

**9 Label unwinder**

Due to the swing lever and an integrated brake the labels are unwound with constant tension.

**10 Liner rewinder**

The liner of a label roll is completely rewound after the labels have been peeled off. The steering axle enables an easy exchange of the label roll.

**11 Cover**

To protect from dust and damage a cover can be mounted.

# Required interfaces

- 1 RS232C interface (restricted function)
- 2 USB 2.0 slave interface
- 3 Ethernet 10/100 Mbit/s interface with TCP/IP
- 4 Two USB master interfaces to connect an external operation panel, a keyboard, a scanner or a service key
- 5 Slot for a CompactFlash Type I memory card
- 6 Connection of a warning light:  
The warning light displays the printer status.  
Green Device switched on  
Yellow Prewarning to end of label resp. ribbon  
Red Error
- 7 Connection of a main valve for air pressure supply:  
For centrally switching on or off the compressed air supply
- 8 Connection of an external E-Stop:  
Along with a connected main valve this interface allows to interrupt compressed air supply in case of emergency.
- 9 Digital I/O interface:  
25-pin Sub-D connector  
Compliant with IEC/EN 61131-2, type 1+3;  
all in- and outputs with galvanic isolation and reverse polarity protection, outputs in addition short circuit protected

## Inputs PNP

- Start printing and applying
- Reprint
- Label feed
- Delete print job
- Pause
- Label dispensed
- Reset
- Stop printing and applying
- Print first label

## Outputs PNP, NPN on request

- Ready to operate
- Print data available
- Paper feed on
- Prewarning end of ribbon
- Prewarning end of label
- Error end of ribbon
- Error end of label
- Label in dispensing position
- Basic position/upper end position
- Applying position/lower end position
- Common alarm

<sup>1)</sup> Limitations may apply to small labels, thin materials or strong adhesives. Critical applications need to be tested.

<sup>2)</sup> The ribbon should at least correspond with the carrier material.

# Stroke applicators 4126/4136

2.1

### Tamp pad

Labels are precisely applied on flat surfaces.

### Spring-mounted tamp pad

Allows labels to be applied even on curved surfaces up to approx. 8°.

### Roll-on pad

While in transport, labels are rolled on flat surfaces.

**Silicone form pad on request**

## Stroke applicator

For real-time labeling on packaging or products. According to the type of pad the product is either in motion or not. Labels may be applied on the product from all sides.

The pad is positioned above the peel-off plate. The label is held by the applicator during the printing process. A short stroke cylinder turns the tamp pad horizontally to the labeling position and places the label on the product. The cylinder stroke defines the maximum distance from the peel-off plate to the product.

Stroke applicator		4126C-300	4126C-400	4136C-300 <sup>1)</sup>	4136C-400 <sup>1)</sup>
Cylinder stroke	mm	300	400	300	400

Distance product/lower edge of device up to	mm	215	315	215	315
Product during labeling		Not moving		Not moving	
<b>Roll-on pad</b>		<b>4126C-4900</b>		<b>4136C-4900</b>	
Label width	mm	50-174		50-174	
Label height <sup>4)</sup>	mm	80-150		151-356	
Distance product/lower edge of device up to	mm	245-275	345-375	275-360	375-460
Product during labeling		In motion		In motion	

<sup>1)</sup> Only in combination with plastic labels    <sup>2)</sup> Calculated at 100 mm label height and 125 mm/s print speed

<sup>3)</sup> If the immersion depth of the applicator is > 25 mm, the cover of Hermes C has to be modified.    <sup>4)</sup> If label height exceeds 210 mm, inside winding is advised.

# Vacuum belt applicators 5326/5426

2.2

## Vacuum belt applicator

For real-time labeling on packaging or products in motion.

Labels may be applied on the product from all sides on plane or cylindric surfaces, or corner-wrap.

The vacuum belt applicator is positioned in front of the peel-off plate. The printed label is moved to the labeling position via vacuum belt and applied on the packaging via external signal. Printing and labeling may be done simultaneously.

Technical data	Vacuum belt applicator	
	5326C	5426C
Labeling	on plane surfaces	on cylindric surfaces and corner-wrap
Dispensing direction	Left	Left

Vacuum belt speed <sup>1)</sup>	mm/s 100-500	100-300
Cycle time <sup>2)</sup>	max. labels/min. 15	15
Label distance to conveyor belt when labeling from the side	Y min. mm 20	20

<sup>1)</sup> The product speed must be equal or higher than the vacuum conveyor belt speed.

<sup>2)</sup> Calculated at 100 mm label height/print speed 100 mm/s

# Accessories

Extra equipment Hermes C	Product
3.1 	<b>Cover V for vertical mounting</b> The cover protects the Hermes C from dirt and damage.
3.1 	<b>Cover H for horizontal mounting</b> With additional dust protection at the side of the product
3.2 	<b>External operation panel</b> If the operation panel is not accessible after the printer has been installed, an external operation panel may be additionally connected. There is a slot for a CompactFlash Type I memory card and a USB host interface, which is further available.
3.3 	<b>Standard keyboard</b> USB connection, 115 keys
3.4 	<b>Memory card</b> CompactFlash Type I to store label formats, fonts, texts. Graphics are readable and writable either at the printer or the PC.
3.5 	<b>Product sensor 25-pin</b> To be connected at the Hermes C. Start of printing and applying when a product is detected, e.g. on a conveyor belt.
3.6 	<b>Interface connector</b> Screw terminals enable all control signals to be connected at the Hermes C I/O interface.

Interface	Product
4.1 	<b>Label selection – I/O box</b> Via a superordinate control, e.g. PLC, up to 16 different labels can be selected from the memory card.
<b>Connecting cable</b>	
5.1 	<b>Connecting cable RS232C</b> 9/9-pin, length 3 m
Extra equipment Applicators	Product
6.1 	<b>Blow tube 4"</b>
6.1 	<b>Blow tube 6"</b>
6.2 	<b>Air pressure regulation unit</b> To be directly mounted at Hermes C or the bracket with an angle. Presetting at 4,5 bar
6.3 	<b>Air pressure regulation unit with additional main valve</b> In case of integrating the print and apply system in a production line, air pressure for the applicator can be switched on or off externally. Presetting at 4,5 bar. Only in combination with an E-Stop
6.4 	<b>Circular connector</b> 3-pin M8 for main valve for air pressure supply
6.4 	<b>Circular connector</b> 4-pin M8 for E-Stop
6.5 	<b>Pressure relief valve</b> To reduce the tamp force; to be installed in the applicator

# Accessories

## Dispensing and removing labels manually

To dispense and remove labels manually a present sensor is needed. In this case, it is advisable to use a mounting foot. The label printer may be mounted with or without a cover.

### 1 Present sensor PS11

#### 1. Automatic dispensing

The present sensor PS11 detects when the label is in labeling position. After the label has been removed manually the next label is printed instantly.

#### 2. Dispensing on request

The print and apply process can be started by pushing the button at the present sensor

### 2 Hand switch TR2

Printing and dispensing on request via the I/O interface. The hand switch is connected via a cable.

## Mounting foot

To fasten the label printer

### 1 Adapter plate

The label printer is mounted on the adapter plate. It may also be mounted directly at the production line by means of the adapter plate and the profile.

### 2 Profile

Standard length 120 mm; further lengths on request

## Bracket

With the bracket the Hermes C can be mounted on a stand or in a production line in any position.

## Clamped joint for profile 50 x 50 mm

With this clamped joint the labeling system can be moved horizontally and vertically.

## Clamped joint for diameter 50 mm

With this clamped joint the labeling system can be moved horizontally and rotated around an axis with a diameter of 50 mm.

# Stands for mounting

7.4

## Stand 1622

For mounting Hermes C in a vertical position into a production line. Height and depth are adjustable by a toothed rack/crank. In addition, the labeling system may be rotated 360° around its axis.

The air pressure regulation unit and the warning light are to be mounted on the bracket.

Technical data		Stand 1622
Adjustable feet	mm	± 15
Load	max. kg	75
(1) Lower edge of printer - ground	mm	150-1,100
(2) Depth crosswise to direction of transport	mm	120
(3) Depth lengthwise to direction of transport	mm	100
(4) Rotation	°	± 90
Weight	approx. kg	40

7.5

## Stand 1221

For mounting Hermes C in a horizontal position into a production line. Height is adjustable by an internal spindle.

The air pressure regulation unit and the warning light are to be mounted on the bracket.

Technical data		Stand 1221
Adjustable feet	mm	± 15
Load	max. kg	75
(1) Lower edge of label - ground <sup>1)</sup>	mm	720-960
(2) Depth lengthwise to direction of transport	mm	± 180
Weight	approx. kg	40

<sup>1)</sup> Further dimensions on request

# Labels and ribbons

- **Two-color** printing on labels in real-time
- For chemical products such as oils, colors or detergents
- On drums, buckets, boxes, pallets etc., resistant to acid and saltwater
- Labels for two-color printing according to GHS
- Certified according to British Maritime Standard BS5609, part 3

In this test, labels that have spent at least three months in sea water must stay affixed on aluminum drums and printed data must still be legible.

For this purpose, cab provides labels made of polyester or polypropylene as well as proper ribbons. Please contact cab.

## Sample label

### Labels

Labels of all sizes, with widths 46 to 176 mm and heights 20 to 356 mm, can be manufactured for Hermes C.

### Ribbons

They are harmonized with Hermes C and the label materials and offer an excellent print quality from the beginning of the roll to the end.

The resin ribbons withstand dissolvers and heat and are highly resistant to abrasion and scratching.

# Software features of the label printer

## Direct programming with JScript

Every cab printer can be directly programmed with the JScript programming language. JScript is described in the programming manual. The label software cablabel S3 optimally supports the direct programming, but may also be generated with any text editor.

## SAP® Member Silver Printer Vendor Program

## Replace files and integration in SAP R/3\*)

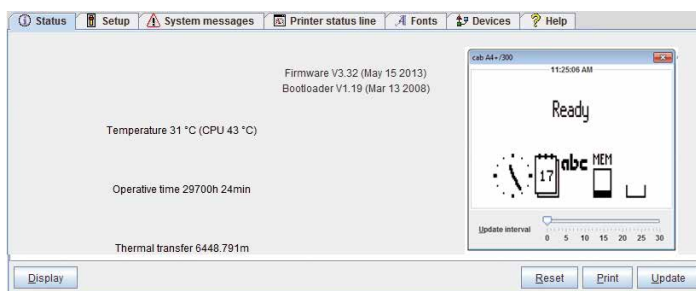

In cooperation with SAP cab developed the so-called replace method to control cab printers quickly and easily from SAPscript using SAP R/3. Using this method the host computer only sends the JScript variable, respectively changed data to the printer. As a Silver Level partner in SAP's Printer Vendor Program, cab has access to SAP development environments for optimum printer support.

goto start
  
```

## abc Basic Compiler

As an integrated element of the firmware, the abc Basic Compiler enables the printer to process data via Basic programming before it is sent for print editing. That way, you replace external printer languages or integrate data from other systems, e.g. a scale or PLC.

## Printer monitoring with Intra- and Internet

Using standard programs such as the web browser or ftp clients, the integrated HTTP and ftp servers enable printer monitoring and configuration, firmware updates and memory card administration. Status, warning and error messages are sent to administrators or users via e-mails or SNMP datagrams via SNMP and SMTP clients. A time server is used to synchronize time and date.

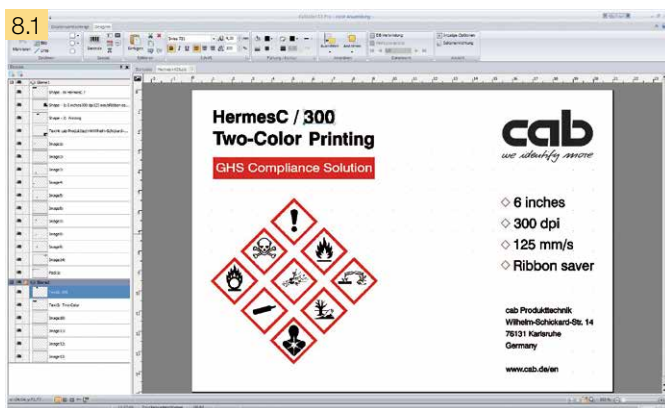

## Database Connector

In stand-alone operation with additional network connection this program allows the printer to access data directly from a central ODBC or OLEDB compatible database and print it on a label. At the same time, data can be written back to the database during the printing process. Integrating the Database Connector in cablabel S3 allows to conveniently establish this database connection when designing a layout.

\*) SAP and all SAP logos are trademarks or registered trademarks of SAP SE in Germany and in several other countries.

## Software tools – label software

cablabel S3 is available for Microsoft\*) operating systems.

Terminal servers/Citrix are not supported.

cablabel S3 is a label software that supports two-color applications. Three functions are integrated:

- **Designing**
- **Printing**
- **Monitoring**

cablabel S3 does open up the full potential of cab devices in the design of your label. An extensive instruction set is available within the intuitive user interface, e.g. different date formats, mathematic or logic functions.

In doing so, cablabel S3 brings together all cab marking systems. First of all you design the label. You do not have to decide before printing whether you like the label to be dispensed on a label printer, a print and apply system or a laser marking system.

Do you like your marking system to print independently of a host system in stand-alone operation? cablabel S3 supports again: After having designed the label, the software supplies with all necessary data stored within the printer to be used in stand-alone operation.

cablabel S3 is of modular design and can be adapted to your requirements step by step: In order to support functions like native programming with JScript, elements like JScript viewer are embedded as plugin. The designer user interface and JScript code are synchronized in real-time. Special functions like Database Connector or barcode testers can be easily integrated.

## Software tools – monitoring

### Administration Network Manager

To simultaneously control a number of printers across a network. It supports monitoring, configuration, firmware updates, memory card administration, file synchronization and PIN administration from one place.

## Printer drivers

### Windows printer drivers for

Windows 10  
Windows 11  
Windows Server 2016  
Windows Server 2019  
Windows Server 2022

Certification WHQL in preparation

Free download on [www.cab.de/en/support](http://www.cab.de/en/support)
